# DERELICT BUILDING GRANT PROGRAM

## IMPROVING COMMUNITIES AND THE ENVIRONMENT

Providing financial assistance to address environmental hazards posed by derelict commercial and public buildings.

FINANCIAL & BUSINESS ASSISTANCE | [WWW.IOWADNR.GOV/FABA](http://WWW.IOWADNR.GOV/FABA)

**THE DERELICT BUILDING GRANT PROGRAM** works with small communities and rural counties to help improve the attractiveness and appearance of their towns by providing financial assistance to address derelict commercial and public buildings. Each project must have a landfill diversion component through the recycling and reuse of materials. The program is funded by the DNR's Solid Waste Alternatives Program.

**GETTING STARTED**

A community's building is eligible for the program if it falls into the following criteria:

- Any county or municipal government with a population of less than 5,000.
- Any commercial or public building that a local government has ownership of or intent to own.
- An applicant may partner with a local non-profit organization on a project.

**TYPES OF ASSISTANCE & FUNDING OPTIONS**

It is important to remember that costs incurred prior to an executed agreement are not eligible for funding and awarded amounts may not equal funding requests.

**GRANT PROGRAM SUCCESSES**

The **CITY OF MALVERN** (pictured above) applied for assistance with renovation that they then tied into a large downtown façade project that also used CDBG funds. The city replaced the roof, tuckpointed the brick and stabilized the overall structure. The building now houses a satellite location for a pharmacy and homecare business as well as two upper story loft-style apartments. The renovation allowed other businesses to move and expand in downtown, reinvigorating the area.

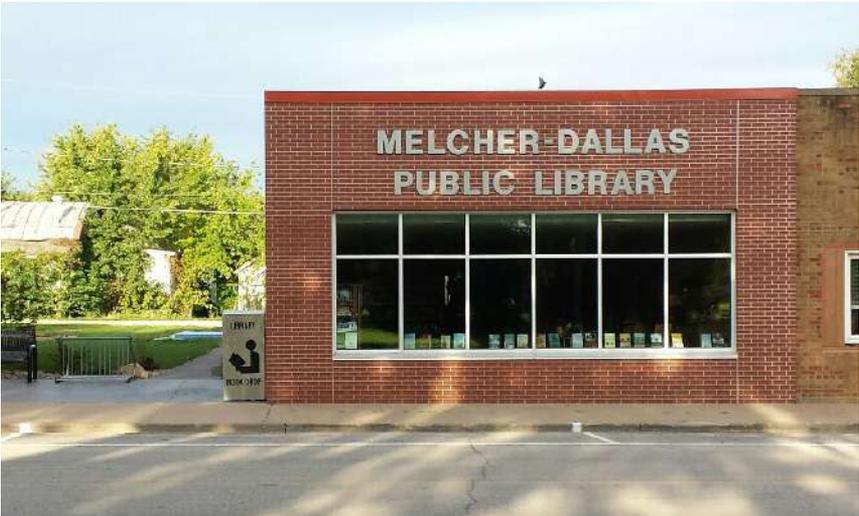

The **CITY OF GRANVILLE** (pictured below) deconstructed an old school, achieving a 97 percent landfill diversion rate for the project. They used reuse markets for items like scrap metal, brick, dimensional lumber and concrete. The city built a new fire and EMS station that will serve surrounding communities. By diverting building materials from the landfill, the city saved about \$33,672 in landfill fees.

ASSISTANCE TYPE	REIMBURSEMENT	MAX. COST
<b>CERTIFIED ACM INSPECTION:</b> Certified asbestos inspectors will investigate derelict structures to determine the presence, prevalence and condition of asbestos.	100 percent	—
<b>REMOVAL AND DISPOSAL OF ACM:</b> Certified asbestos removal contractors will properly remove, manage and dispose of ACM. A 50 percent cost share is required for costs exceeding \$10,000.	100 percent	\$10,000
<b>STRUCTURAL ENGINEERING ANALYSIS:</b> Licensed structural engineers will inspect derelict structures to assess the overall structural condition of the building.	100 percent	\$1,500
<b>PHASE I ENVIRONMENTAL ASSESSMENT:</b> Review of known environmental records and land use information about the site and vicinity. Applicant is responsible for all costs exceeding \$3,000.	100 percent	\$3,000
<b>PHASE II ENVIRONMENTAL ASSESSMENT:</b> Actual soil, groundwater, and structural materials' sampling to confirm or deny if contamination is present. The need for this assessment is driven by the results of the Phase I Assessment. Applicant is responsible for costs exceeding \$5,000.	50 percent	\$2,500
<b>BUILDING DECONSTRUCTION:</b> Dismantling of structures with the purpose of maximizing recycling and reuse of materials to minimize landfill disposal. Goal of 30 percent landfill diversion by weight.	50 percent	\$50,000
<b>BUILDING RENOVATION:</b> Using waste minimization, reuse and recycling practices, including the use of salvaged or recycled content material during the renovation process. For offsetting costs related to removing materials for reuse, either at the site or offsite, or for recycling. The grant also compensates for the purchase and installation of reused or recycled materials that will be incorporated into the project.	50 percent	\$50,000

Find more completed projects at [WWW.IOWADNR.GOV/FABA](http://WWW.IOWADNR.GOV/FABA); click on the Derelict Building Grant Program link.

The **CITY OF MELCHER-DALLAS** needed assistance with asbestos abatement and renovating a former coin-operated laundromat. The renovation project resulted in a brand new library for the residents of Melcher-Dallas and a neighboring green space for public use.
